July 2020 Coordinated Inauthentic Behavior Report
We’re constantly working to find and stop coordinated campaigns that seek to manipulate public debate across our apps. In 2019, we took down over 50 networks worldwide for engaging in coordinated inauthentic behavior (CIB), including ahead of major democratic elections. You can find more information about our previous enforcement actions [here](#).

**PURPOSE OF THIS REPORT**

Over the past three years, we’ve shared our findings about coordinated inauthentic behavior we detect and remove from our platforms. As part of regular CIB reports, we’re sharing information about all networks we take down over the course of a month to make it easier for people to see progress we’re making in one place.

**WHAT IS CIB?**

We view CIB as coordinated efforts to manipulate public debate for a strategic goal where fake accounts are central to the operation. There are two tiers of these activities that we work to stop: 1) coordinated inauthentic behavior in the context of domestic, non-government campaigns (CIB) and 2) coordinated inauthentic behavior on behalf of a foreign or government actor (FGI).

**COORDINATED INAUTHENTIC BEHAVIOR (CIB)**

When we find domestic, non-government campaigns that include groups of accounts and Pages seeking to mislead people about who they are and what they are doing while relying on fake accounts, we remove both inauthentic and authentic accounts, Pages and Groups directly involved in this activity.

**FOREIGN OR GOVERNMENT INTERFERENCE (FGI)**

If we find any instances of CIB conducted on behalf of a government entity or by a foreign actor, we apply the broadest enforcement measures including the removal of every on-platform property connected to the operation itself and the people and organizations behind it.
CONTINUOUS ENFORCEMENT

We monitor for efforts to re-establish a presence on Facebook by networks we previously removed. Using both automated and manual detection, we continuously remove accounts and Pages connected to networks we took down in the past.

SUMMARY OF JULY 2020 FINDINGS

This month, we removed nine networks of accounts, Pages and Groups. We reported the removal of four of these networks at the beginning of July, and we’re sharing the remaining five today. We have shared information about our findings with law enforcement, policymakers and industry partners.

More than half of these networks focused on domestic audiences in their own countries, including in the United States, Brazil, Ukraine, the Democratic Republic of Congo and Yemen. Much of the activity we removed in July was linked to commercial entities and individuals associated with political campaigns and political offices. We’ve seen and taken action against domestic political figures using CIB in the past, and we know they will continue to attempt to deceive and mislead people. Domestic campaigns like these raise a particularly complex challenge by blurring the line between healthy public debate and manipulation. Our teams will continue to find, remove and expose these coordinated manipulation campaigns, but we know these threats extend beyond our platform and no single organization can tackle them alone. That’s why it’s critical that we, as a society, have a broader discussion about what is acceptable political advocacy and take steps to deter people from crossing the line.

technology, hiring more people and working closely with law enforcement, security experts and other companies.

We removed 303 Facebook accounts, 181 Pages, 44 Groups and 31 Instagram accounts for violating our policy against foreign interference which is coordinated inauthentic behavior on behalf of a foreign entity. This network operated from many regions around the world including the US, Canada, Australia, New Zealand, Vietnam, Taiwan, Hong Kong, Indonesia, Germany, the UK, Finland and France. It focused primarily on English and Chinese-speaking audiences globally and on Vietnam.

This network relied on a combination of authentic, compromised and fake accounts — some of which had been detected and disabled by our automated systems — to evade enforcement, drive people to off-platform sites, comment on their own and other people’s content, and manage Groups and Pages posing as regional news entities. They also spammed Groups with their content, likely using automation. Some of these accounts have gone through name changes over time.

The people behind this activity posted about global news and events including geopolitics and political figures, the Hong Kong protests, the US administration’s policies towards China, the Falun Gong movement, criticism of the Chinese government, the ongoing US protests and conspiracy theories about who is behind them. The majority of these accounts appeared to have been purchased after they were self-compromised by sharing their credentials in return for free followers. They posted primarily in Arabic about domestic news and current events including social and political issues in western Iraq and Baghdad, praise of recent Iraqi protests and criticism of the Iranian government and its alleged proxies in Iraq.

We found this network as part of our internal investigation into suspected coordinated inauthentic behavior that showed some links to the network we removed in September 2019. The people behind this activity used duplicate and fake accounts to create fictitious personas, post in Groups, drive people to off-platform sites and manage Pages posing as independent news and fact-checking entities. They also impersonated opposition and political candidates and reposted their exact content, likely to build an audience. This network used fake accounts — some of which had been detected and disabled by our automated systems — to post content and comments, drive people to off-platform sites and manage Pages masquerading as news outlets. Some of these accounts purported to be located in Syria. Some of these Pages impersonated various government, civil society and news entities, and engaged in inauthentic amplification by offering cash rewards for sharing this network’s content. They primarily posted comments about local news and events including politics, positive commentary about the former prime minister of Yemen, criticism of the United Arab Emirates, the UAE-backed Southern Transitional Council of Yemen and the Houthis.

This network relied on a combination of authentic and inauthentic accounts, some of which had already been detected and disabled by our automated systems. This operation — which was also active on other internet platforms — activated around civic events such as elections, at times posting on both sides of the political debate, and then abandoned or paused its activity. They used fake accounts to pose as locals in countries they targeted, post and like their own content, drive people to off-platform sites, and manage Pages posing as independent news in countries they targeted. Some individuals behind this activity created multiple duplicate accounts under their own name. This network posted about domestic news in the countries it targeted, including topics such as politics, activism, praise and criticism of political candidates, elections, the government of Venezuela, both support and criticism of the President of Ecuador, political parties in the region including Farabundo Martí National Liberation Front in El Salvador, Peronist party in Argentina, and the Progressive party in Chile.

The people behind this activity used fake accounts — some of which had already been detected and disabled by our automated systems — to pose as residents of Florida, post and comment on their own content to make it appear more popular than it is, evade enforcement, and manage Pages. Several of these Pages had links to Proud Boys, a hate group we banned in 2018. Some Pages appeared to have acquired followers from Pakistan and Egypt to make themselves seem more popular than they were. This network, which was also active on other internet platforms, was most active between 2015 and 2017. Since then, the majority of these accounts have been dormant, and some were permanently deleted by the users. The Page admins and account owners posted about local politics in Florida, Roger Stone and his Pages, websites, books, and media appearances, a Florida land and water resources bill, the hacked materials released by Wikileaks ahead of the US 2016 election, candidates in the 2016 primaries and general election, and the Roger Stone trial.
